

To help ensure you stay  ...

- Please tell us about your symptoms and medical history in full
- Know what medications, if any, you are taking (or bring a list)
- Tell us about allergies and any problems you have had with medications
- Tell us about any underlying health conditions such as diabetes, asthma, epilepsy, heart disease or stroke
- Complete the course of treatment prescribed
- Ask questions if you have any concerns
- When a family member or friend has trouble speaking for themselves or understanding about their condition, please ask questions for them
- If you are pregnant, or you think you might be, make sure you tell the receptionist or chiropractor before you have any treatment or x-rays

Keeping patient safety and wellbeing at the heart of all we do

In this clinic, we always strive to provide the safest and most effective care. By participating in the Royal College of Chiropractors' Safe with us initiative, we aim to ensure that we:

- Share and learn from national patient safety experiences
- Make changes where needed to continually improve all aspects of patient safety
- Maintain a clear patient safety policy
- Keep patient safety and wellbeing at the heart of all we do

If you wish to discuss any aspect of patient safety, please ask to speak to our Patient Safety Lead.

About The Royal College of Chiropractors (RCC)

The RCC is a professional membership body which provides postgraduate and professional training and, with the help of its academic committees and a dedicated Lay Partnership Group, recognises quality, safety and excellence in chiropractic practice. The RCC takes a practical approach to foster best practice in a number of areas and developed the Safe with Us initiative to help chiropractic clinics maintain and share the best possible patient safety practices.
